

Virtual Workshop for Pre-Service Teachers: *From Land to Stream*

Bring nature into your classroom!

WHEN: Wednesday, April 29, 2020, 6 - 8 p.m. EST

WHERE: Zoom (online). Information will be shared directly with all registrants via email.

Are you a **pre-service teacher** (undergraduate student) looking for fresh ways to engage PreK-5 students in the natural world and **environmental education (EE)**? Join Stroud Water Research Center and Pennsylvania State Parks on Zoom for From Land to Stream — on the screen! In this 2-hour virtual tour of EE resources for early childhood through elementary learners, participants will be introduced to both digital and hands-on resources and activities to help you integrate EE into your classroom.

Experience a guided exploration of **FREE** online simulations, model in-class activities like owl pellet dissection and camouflage creations, and participate in a virtual stream macroinvertebrate exploration. In-service teachers or non-formal educators are welcome, but please note that this is an introductory workshop designed specifically for **new** or **early-career educators**.
