

Advanced Watershed Educator Workshops

Workshops for **non-formal educators** to Become Meaningful Watershed Educational Experience (MWEE) Ambassadors

We all rely on the services provided by our natural world to survive and thrive—and we can all play a role in supporting a healthy and vibrant ecosystem. More than 1,740,000 students live and learn in Pennsylvania, and the future well-being of our watersheds will soon rest in their hands.

Stakeholders across Pennsylvania are working to support students to graduate with the knowledge and skills to protect and restore their local watershed through the participation in MWEEs. MWEEs are learner-centered experiences that focus on investigations into local environmental issues that lead to informed action and civic engagement.

MWEEs depend on the facilitation and support of both school and non-formal, field-based educators for the experiences to be holistic and impactful. This workshop will help prepare non-formal environmental education providers to partner with K-12 classroom teachers on a MWEE.

This workshop has been designed to provide a deep understanding of the MWEE as a vehicle for advancing environmental literacy and stewardship while increasing standards-based student achievement. To become a MWEE Ambassador, non-formal educators need to attend one of the MWEE Ambassador trainings and complete online learning modules.

BONUS! Each MWEE workshop will be paired with an **optional second day** focused on enhancing your hands-on water education skills: aquatic macroinvertebrates, water chemistry, stream habitat assessments, riparian restoration, watershed modeling, stormwater best management practices, or manure management impacts (2-4 of these topics specific to each site)!

Find more information about MWEEs at <http://baybackpack.com/mwee/developing-your-mwee>

Workshops available in each region of Pennsylvania!

(see other side or go online for more details)

AVONDALE: April 9-10, 2019
