

Implement Meaningful Watershed Education in Your School District!

Are you a **K-12 school administrator** passionate about supporting your teachers and students through relevant and real **watershed education**?

Learn how to support successful implementation of **Meaningful Watershed Educational Experiences** (MWEEs) in your classrooms to help advance **environmental literacy** and **stewardship** while increasing **standards-based student achievement**. MWEEs are learner-centered experiences in which students investigate local environmental issues and complete informed action projects.

In addition to becoming a Certified MWEE Ambassador, you will tour a suite of stormwater and agricultural best management practices.

BONUS! All attending school districts will receive **environmental education instructional materials** to take back to their teachers. One attending school district will **WIN a \$1,000 stipend for instructional materials**, and a second district will receive **\$500!**

Find more information about MWEEs at
<http://baybackpack.com/mwee/what-is-a-mwee>
